- Busy support forums, help you find answers to your questions even when the office is closed
- ISO 9001 accredited company

- The current range of Frog lighting controllers have evolved from the former Fat Frog, Leap Frog and Bull Frog consoles. The original Frog range sold more than 9000 consoles during their manufactured life and are still in demand today.

- Whilst the Jester range caters for the entry and mid level markets the Leap Frog 48 & 96 has been designed for the bigger pro users – requiring a more sophisticated feature set.

- The consoles have been developed using feedback from operators around the globe, paying special attention to the users of competitive products such as the Avolites Pearl, Hog 1000 and our huge Frog user base, which is reflected in the many features found on these consoles. The Leap Frog provides a richer, more powerful feature set giving the operator the functionality and flexibility to achieve more.

- Leap Frog 48 provides control of up to 248 devices over 4 universes of DMX
- 48 physical faders allow for quick access to generic lights whilst busking or fixture selection with HTP control of intensity on the fader in “Pearl Mode”
- Command line available via the special MFK keys or external keypad

- Leap Frog 96 provides control of up to 296 devices over 4 universes of DMX
- 96 physical faders allow for quick access to generic lights whilst busking or fixture selection with HTP control of the intensity on the fader in “Pearl Mode”
- Command line available via the special MFK “Multi Function Keys” or external keypad

- Fully Tracking console
- 4 universes of optically isolated DMX outputs – Also outputs on Artnet
- USB support allows show storage to USB devices, support for external peripherals and a touchscreen
- Store multiple show files to the internal Flash drive (Version 4 Software – Hardware upgrade required)
- Shows cross loadable with Orb & Frog 2 – will also run original Frog series show files
- Multi Function Keys speed up programming (MFK's)
- 400 Groups & Macros, 400 Palettes of each Colour, Beamshapes and Position
- 200 submasters – now record chases directly and can be configured as playback faders providing multiple playback stacks
- Full context sensitive online help
- New Colour Picker! (Version 4 software)
- Bi directional communication with Light Converse visualiser – support for Capture and Wysiwyg
- Off line editor
- Full fixture library on board - now with over 1800 fixtures
