

International Baptist Church Project

“The future looks Bright”

The Client

The International Baptist Church is located in the heart of Farrer Road, Singapore. The Church accommodates various communities and has several church services catering to the different communities. The church uses its lighting in every service and is one of the key component in the service. They have a mixture of Parcans and Fresnels and PCs situated above the area where they conduct services.

About the Project

The installation was quite straight forward. The client had a limited budget to work with but insisted on quality equipment that came with proper service and warranty.

The current system of 2 units of 6 x 10A channel Light-processor dimmers which were hardwired were replaced with the Rack 6, UK. The old lighting console was replaced with the Zero 88 Jester 12/24 Lighting console also.

The user was astonished at the simplicity of use and easy load of shows and uploads with the use of a thumb drive. The OS of the console could also be periodically be updated through the USB port. Training on using the board , was completed in under 30 minutes.

The DMX connections were double checked and we were ready to go , it took only one day for the installation to be completed and tested.

It is with great delight that client feels happy with our installation. The design and consultation was done by P.V. Joseph, Mr Fazli was the Site co-ordinator and Mr Wandu in-charge of installation of Dimmer systems

The future looks bright, indeed.

Who we are

Lighting Controls Pte Ltd services the needs of dealers and clients in the Asian Region. It also will carry considerable stock of Zero 88 products to cater to rising demand of Asian Dealers and customers.

This strategic move is to provide a more comprehensive service and stock availability for the new and up coming projects in the region especially the Integrated Resorts.

The office keeps trained technicians to handle service related issues and give quick response to dealers and clients who require training in the use of the Zero 88 range of products.

Our Mission

"To light up your world for a sustainable and conducive environment for all to work and live for the present and the future."
